An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 8-24, and 40-45, drawn to a stationary phase for chromatography, classified in class 210, subclass 198.2.
- II. Claim 46, drawn to an inorganic substrate modified by at least two silanes, classified in class 210, subclass 502.1.

The inventions are independent or distinct, each from the other because:

Inventions I and II are not related because they are directed to different compositions, are not obvious variants, and have a materially different design.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

During a telephone conversation with Cynthia R. Moore on June 28, 2006 an election was made to prosecute the invention of Group I, claims 1-6, 8-24, and 40-45. Claim 46 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim 46, drawn to a non-elected invention, has been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Cynthia R. Moore on June 28, 2006.

Any inquiry concerning this communication should be directed to E. Therkorn at telephone number (571) 272-1149. The official fax number is 571-273-8300.
